

RESUM

I am currently working as Fullstack Web-Developer with frontend focus for the Bawag Group in the internal audit department.

I occupy a leading role within the “Digitalization Program” and have started several initiatives regarding internal information and education, as well as deployed and maintained web applications in cross-departmental cooperation.

Since February 2020 I have also taken on the responsibility of managing a colleague in my division, whose focus lies on backend web development.

In my spare time I am seeking out new possibilities to utilize my knowledge, be it to improve my portfolio, solve current matters on hand or educate myself further.

Since September 2020 I am continuing my studies at FH Technikum, where I am acquiring MSc degree in Innovation- and Technologiemanagement, completing it prospectively in Mai 2022.

You will find my digital cover letter on my homepage <https://costapaul.com>.
